

# New Home Cleaning Products That Save Busy Moms Time and Energy

Teresa Ward  
July 2010

The most invaluable cleaning tools I use are microfiber cloths. These eco-friendly products require less effort to clean and save you money because they last longer.

Cleaning with dry microfiber cloths or using them with water allows you to clean your home or workspace quickly and effectively without dangerous chemicals and pollutants.

## Joy for “Germaphobes”!

Cleaning a surface with microfiber cloths—that have superior power to attract dust, grease and dirt—reduces the number of bacteria by 99% whereas a conventional cleaning cloth reduces bacteria by only 33%.

Microfiber cloths offer busy moms a quick, “green” clean solution with no harm or danger to their children or pets. These eco-friendly cloths

- ◆ Cut chore time considerably, with faster, more effective cleaning
- ◆ Simplify the cleaning process--just rinse and go from one cleaning task to the next
- ◆ Protect your family from harmful chemicals and allergic reactions
- ◆ Save money--reduces what you spend on cleaners and paper towels by 70% or more
- ◆ Clean mirrors and other glass surfaces without streaking.
- ◆ Remove soap scum and ring-around-the-tub from bathroom areas
- ◆ Absorb grease and dirt from all hard kitchen surfaces
- ◆ Dust all home / office electronics thoroughly: computer keyboards, cameras, CDs, DVDs
