

Ambit Energy – Achieving Financial Freedom!

Bob Kudlek
July 2011

Most people are willing to continue thinking about what life would be like if they only had the money and time to do the things they wanted to do. Very few are willing to take the necessary steps to have that kind of life.

Most people would love to find an opportunity that would provide a lifestyle of wealth and time freedom, but have not found the right vehicle for that change, or they possibly do not realize that it exists. The only question now is whether or not Ambit Energy is the right vehicle to help you accomplish your financial goals.

In an article that I previously wrote I established that energy deregulation is a ground-floor opportunity with amazing upside potential. It's a \$24 billion business annually in Texas, \$11 billion in New York, more than \$2 billion in Illinois and Pennsylvania and nearly \$2 billion in Maryland; a total of \$42 billion in our available markets.

But is residential energy a good fit for your home-based business?

Let's review the advantages:

Everyone understands it. Everyone uses it. Everyone likes to save money. It's easy to explain. And anyone can sell it.

Electricity and Natural gas is unconsciously purchased and habitually used by everyone you know, and everyone you don't know. You have the ability to create a residual income helping people save money on a public utility.

Sounds like a very promising start.
