

Wellsys Water Solutions

Wellsys - New York

May 2009
Alan Goldberg

Wellsys Water Solutions offers an innovative, healthier, more cost effective solution for your Point of Use Water Coolers.

Wellsys Water Solutions provides an affordable alternative to the traditional bottled water cooler solutions you are familiar with and a healthier solution than the hall water fountain. We only provide water solutions to your business. We aren't like other companies who want to sell you coffee, snacks, supplies and the kitchen sink. **We specialize in one thing and we do it well!**

For a fixed monthly rental our unit will provide pure water to your business without all the bacteria, and potential health risks associated with the delivery and dispensing of your existing bottled water coolers and water fountains. We tap directly into your building's water pipes and provide the most comprehensive water filtration on the market. No more deliveries, no more invoice reconciliation, no more bulky bottle storage, no more lifting those heavy 42lb bottles, no running out of water, and a way for your organization to participate in the "Green Initiative".

Traditionally, companies provided bottled water coolers to supply drinking water to their employees. They thought they were doing them a service. Water coolers which use the typical 5 gallon bottles have issues which many are not aware of or have not

thought about. Big companies have spent a lot of advertising and marketing dollars to convince you that bottled water is better for you. What is actually in those 5 gallon bottles, where did the water come from, how much filtration did they receive, what standards must they adhere to? Who in your office cleans the dirt and bacteria from the bottles and who is responsible for the sanitization of the cooler itself? Where have those bottles been, in a warehouse, on a truck, on a sidewalk, in a storage closet?

We will meet with you and explain all the benefits of using our unit. The great thing about installing our units is that we are not asking you to spend more money than you are currently spending on your bottled water. Spend less, get great tasting, healthier water, FREE Professional Installation, Go Green, it's all good!

Call or E-mail us with your contact info and we'll set up a brief meeting to explain the benefits and get you approved for a FREE two week trial. We look forward to working with you. Contact: Alan@WellsysNY.com
