

At a Glanz... Lighting Up Long Island

Rich Glanzer
November 2008

I can't believe its me! I'm normally the first one to say, "Bah Humbug" to all the Christmas talk in

November, but this year, not only am I embracing the holiday talk early, I'm starting it. But it's not my fault, its Chris Eusini's.

For many years, I've done business with Chris. He's helped me and my family with our computer needs. He actually built my computer from scratch. There has never been a problem with my computer, and Chris makes sure of that by keeping in touch with me to make sure I install all the latest updates. He could have
Chris is helping light up Long Island by installing Christmas lights this holiday season. His business, the North Pole Lighting Company, will customize and decorate your house or business this year.

They begin with a customized design plan. They have an experienced design consultant to help the customer with his or her needs. Once the design is approved, the installation process

is scheduled. Throughout the holiday season the North Pole Lighting Company will periodically visit the property to ensure all decorations have maintained their appearance.

Service calls are free of charge and typically occur within 24 hours or less. Representatives are available to its customers 24 hours a day from season commencement until the end of the contract term. Their removal service is prompt, neat and orderly. Once the season is over, all decorations are safely packed tagged, and stored.

One price includes all of their professional services. And they are green friendly!!

As someone that's done business with Chris, I can personally assure you that few people care about their work as much as Chris does. He is passionate, friendly, and most importantly, awesome at his job!

If you want more information, you can call (516) 978-SANTA (7268), or log onto www.northpolelightingcompany.com. Or you can email Chris at santa@northpolelightingcompany.com.

But please, after you call Chris, no Christmas songs until mid-December!!
